

# The Shop Owner's Manual

Every screen of the software, explained the way the shop works: what it is for, what to press, and what happens to your stock, your cash and your khata when you press it.

Keep this near the billing computer. Chapters are short on purpose — read the one you need, when you need it.

---

## What is inside

1. Your first day — setting up once
2. The Dashboard and getting around
3. Item Creation — what you sell
4. Tag & Barcode — stock, one piece at a time
5. Customers
6. Suppliers, karagirs and refineries
7. Purchase — metal coming in
8. Sales Invoice — the everyday bill
9. Old gold on a bill, estimates and credit bills
10. Sales Register and Returns
11. Old Gold Purchase — buying old gold outright
12. Old Gold Report
13. Receipts, Payments and Settlements
14. Order Booking
15. Karagir Job Work
16. Refining
17. Gold Saving Scheme
18. Stock Report and Stock Verification
19. Reservations and approval memos
20. Repairs
21. Hallmarking
22. Catalogue — names and categories

23. Day Book — closing the shop
24. Daily Closing — counting the drawer
25. Ledger / Khata and Outstanding
26. Accounting Books, Registers and GST
27. MIS reports — the owner's questions
28. Branches and stock transfer
29. Changeover Check — before you trust it
30. Settings, users, invoice design, phone view
31. Backup — every single evening
32. Printing the barcode tags
33. How every number is worked out
34. When a figure looks wrong
35. Keyboard shortcuts and words used

# 1 Your first day — setting up once

Half an hour, done once. After this the software runs the shop.

## What to do, in order

- 1 Sign in with **admin / admin**. Go to **Settings → Users** and change the password straight away. Give every person at the counter their own login.
- 2 **Settings → Company**: shop name, address, phone, GSTIN, state, bank details. These print on every bill exactly as typed.
- 3 **Settings → Accounts**: open **Cash Account** and **Bank Account** and type the **opening balance** — the cash in the drawer and the money in the bank on day one. This is the figure most people forget.
- 4 **Customers** and **Suppliers**: add the people you already deal with, with what they owe you (**Dr**) or you owe them (**Cr**).
- 5 Put the gold in. See the table below — money is only half of what you hold.
- 6 Run **Changeover Check** after one month of double entry (chapter 29) before you stop the old book.

## Putting the gold in

| WHAT YOU HOLD                       | WHERE IT GOES                                                                                            |
|-------------------------------------|----------------------------------------------------------------------------------------------------------|
| Tagged pieces on the shelf          | <b>Tag &amp; Barcode → New stock</b> . Weight, purity, and what it cost you per gram ( <b>Cost/gm</b> ). |
| Loose bullion and scrap in the safe | <b>Tag &amp; Barcode → From loose metal → Opening metal</b> . Not a purchase — you owe nobody for it.    |
| Gold a karagir is holding           | On his record under Suppliers, as an opening metal balance in grams, Dr.                                 |
| Metal a trade customer owes you     | On their record, as an opening metal balance in grams.                                                   |

### FILL IN COST/GM ON EVERY PIECE

A piece with no cost still shows its weight, but counts as nothing towards your stock value — your books will say you are poorer than you are. The Stock Report tells you how many pieces are missing a cost.

## 2 The Dashboard and getting around

**DASHBOARD**  
The shop at a glance: today's sales, stock in hand, money due, and quick actions.

The Dashboard: today's sales, stock in hand, money due, and quick actions.

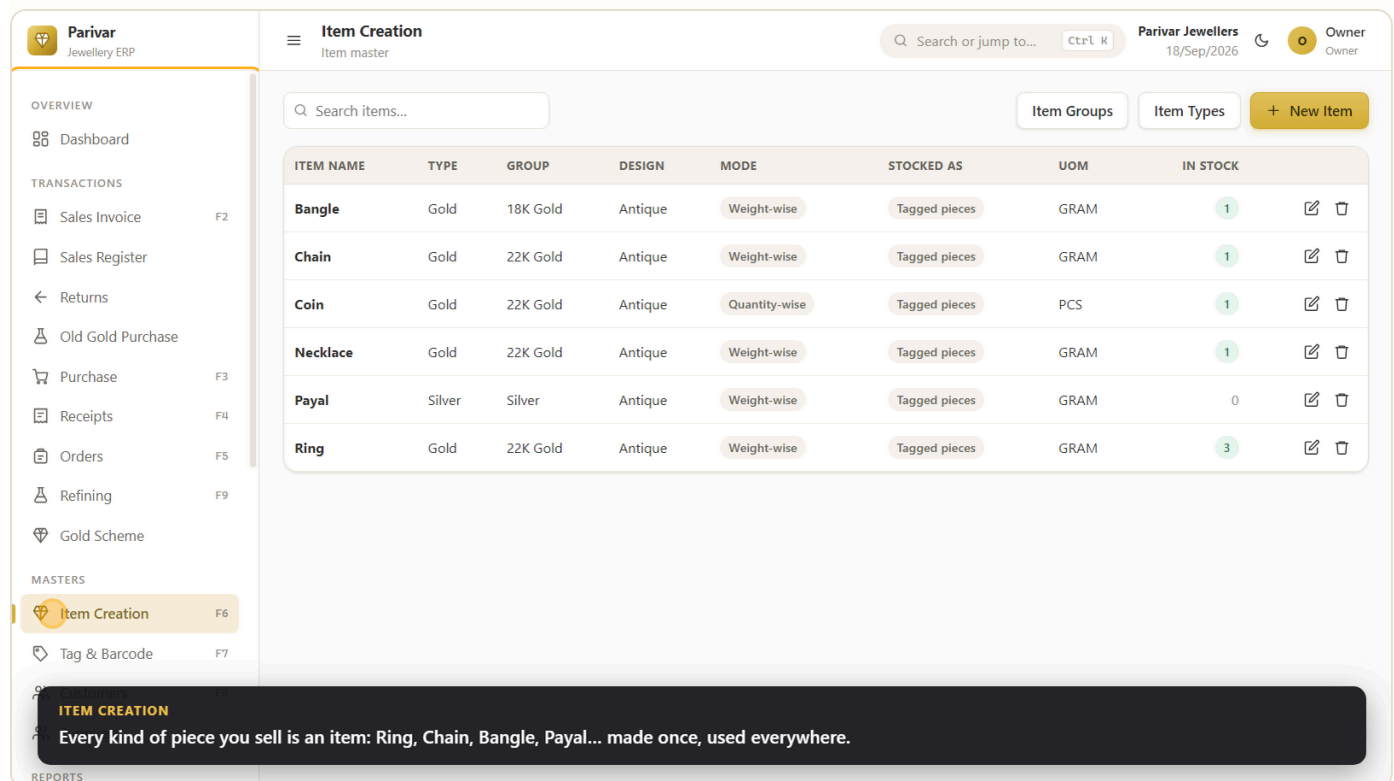

- **Left menu:** Transactions (billing, purchase, receipts, orders, refining, old gold, scheme), Masters (items, tags, customers, suppliers), Reports.
- **Quick actions** at the top of the Dashboard go straight to a new bill, new stock, a new customer, or a receipt.
- **Ctrl + K** opens the search box: type any page name or a customer's name and press Enter.
- Function keys: **F2** bill, **F3** purchase, **F4** receipts, **F5** orders, **F6** items, **F7** tags, **F8** customers, **F9** refining.
- The moon / sun button at the top switches dark mode.

### NOTHING HERE IS TYPED TWICE

Every figure on the Dashboard and in every report is worked out fresh from the bills, receipts and purchases you saved. There is no running total that can quietly go wrong; fix a bill and everything that depends on it corrects itself.

### 3 Item Creation — what you sell

Masters → Item Creation (F6). Make each kind of piece once.

**Parivar Jewellery ERP**

**Item Creation**

| Ring      | Gold   | 22K Gold | Antique | Weight-wise   | Tagged pieces | GRAM | 3        |  |

**ITEM CREATION**  
Every kind of piece you sell is an item: Ring, Chain, Bangle, Payal... made once, used everywhere.

The item master: type, purity group, how it is stocked, and how many are in stock.

- 1 Press **New Item**. Type the name — Ring, Chain, Bangle, Payal, Pendant.
- 2 Choose the **Item Type** (Gold, Silver, Platinum, Stone) and the **Item Group** (22K Gold, 18K Gold, Silver...). The group carries the default purity.
- 3 **Stocked As**: *Tagged pieces* for anything that gets a barcode. *Loose by weight* for mani, fuli, dori — bought as 100 g and sold as 10 g, no tag.
- 4 HSN code (7113 for jewellery) and a **reorder level** if you want a warning when stock runs low. Save.

**New Item** [X]

**ITEM CREATION**  
Pendant — Gold — 22K.

Cancel [Save]

New Item: name, type, group, stocked-as.

The **tag prefix** is made from the first three letters — every Pendant barcode will read PEN00001, PEN00002... You never have to think of a number.

**Item Groups** and **Item Types** buttons on the same screen let you add a group (say 20K Gold at 83.3%) or a design (Antique, Filigree) once.

## 4 Tag & Barcode — stock, one piece at a time

Masters → Tag & Barcode (F7). This screen is your stock register.

**Parivar Jewellery ERP** | **Tag & Barcode** | Tagged stock entry | Search or jump to... | **Parivar Jewellers** 18/Sep/2026 | **Owner**

**Create Tags** | Net = Gross - Stone - Black beads

Where is this metal from? **New stock** | **From loose metal** | Select Item \*  
Pieces that are simply in the shop — first-time stock entry | Choose an item to tag...

**Pick an item to begin**  
Each row becomes one physical piece with its own tag number.

**Tagged Stock** | Search tag or item... | In stock | Any label | Export

| TAG                      | ITEM     | GROUP    | GROSS    | NET    | PURITY | LOCATION | LABEL  | STATUS      |          |
|--------------------------|----------|----------|----------|--------|--------|----------|--------|-------------|----------|
| <input type="checkbox"/> | BAN00002 | Bangle   | 18K Gold | 22.750 | 20.700 | 75.00%   | Shop   | Not printed | In stock |
| <input type="checkbox"/> | CHA00002 | Chain    | 22K Gold | 31.200 | 31.200 | 91.60%   | Locker | Not printed | In stock |
| <input type="checkbox"/> | NEC00001 | Necklace | 22K Gold | 45.300 | 41.800 | 91.60%   | Shop   | Not printed | In stock |

**TAG & BARCODE**  
Choose the item, type gross weight and purity — net and fine weight are worked out for you.

Create Tags at the top; every tagged piece in the shop listed below.

### New stock

- 1 Choose the item. The purity fills in from its group; the making charge from the Making Master, if you have set one.
- 2 In **Same for every piece**, set what applies to the whole batch: purity, making per gram, hallmark, **Cost/gm**, location, tray.
- 3 One row per piece: gross weight, stones or beads if any. Net and fine weight are worked out as you type. Paste a block from Excel if you have one.
- 4 **Save N tags**. Each piece gets its number and appears in the list below. **Save & Print** does the same and opens the barcode label print for the new pieces straight away.
- 5 Tick the pieces and press **Print labels** (chapter 32).

NET

PURITY

LOCATION

LABEL

STATUS

From loose metal: what is in the pool, what these pieces need, what is left.

- **From purchase:** pick the invoice the pieces were made from and the purchase can tally its bought weight against the labels. Choose **All purchases** to label against every open invoice of that metal at once — each piece is booked to the oldest invoice that still has room for it, so the invoices tally in the order they came. Choose **All loose metal** to draw on the whole pool without tying the labels to any invoice.
- **Opening metal:** the bullion and scrap in the safe on the day you started. Enter it here, not as a purchase.

### WHY TAGS MATTER

At the counter the tag does the typing. Scan it and the whole piece — weight, purity, making, hallmark — lands on the bill. No retyping, no mistakes, and a piece can never be sold twice.

## 5 Customers

**CUSTOMERS**  
Every customer with their money balance and metal balance in one list.

Every customer with their money balance and metal balance.

- New Customer.** A name and a mobile is enough to start billing; add area, address, GSTIN, PAN as you go.
- Opening balance:** what they already owe you (**Dr**) or what you owe them (**Cr**) on the day you start. Opening **metal** balance in grams for trade customers.
- Birthday and anniversary, so you can greet them. Tick **loyalty points** if you run a points scheme.

and reservations, and a timeline of every bill, receipt, order and repair they have ever had. [Ledger](#), [New Sale](#) and [Receive](#) are one click away.

#### **DR AND CR, ONCE AND FOR ALL**

**Dr** = they owe you. **Cr** = you owe them. Money and gold are kept as two separate balances — a customer can owe you rupees and owe you grams at the same time.

## 6 Suppliers, karagirs and refineries

Masters → Suppliers. Everyone you buy from or send gold to.

**Parivar Jewellery ERP**

**Suppliers**

Search or jump to... **Ctrl K**

Parivar Jewellers 18/Sep/2026 **Owner**

Search suppliers...

Export + New Supplier

| NAME          | MOBILE     | AREA | CITY   | GSTIN           | BALANCE            |
|---------------|------------|------|--------|-----------------|--------------------|
| Bullion House | —          | —    | —      | —               | 0.00               |
| Mahavir Gold  | 9820011223 | —    | Mumbai | 27MAHAV5678G1Z2 | ₹1,61,30,198.54 Cr |

**SUPPLIERS**  
Wholesalers, bullion dealers, karagirs and refineries — each with a money khata and a gold khata in fine grams.

Suppliers, karagirs and refineries, each with a money khata and a gold khata.

- **Supplier:** the wholesaler or bullion dealer you buy from. Purchases on credit go onto this khata.
- **Karagiri:** the goldsmith you hand metal to. His gold khata shows what he is holding of yours (chapter 15).
- **Refinery:** where scrap goes to be melted into pure gold (chapter 16).

Each has the same record as a customer, plus an opening metal balance in grams. In our trade gold moves between these people more often than money, so both khatas are always kept.

## 7 Purchase — metal coming in

Transactions → Purchase (F3). One entry; stock and the supplier's khata update by themselves.

**Parivar Jewellery ERP**

**Purchase Invoice**

**PURCHASE**  
The purchase register: gross, net and fine bought, and whether each invoice has been labelled.

The purchase register: gross, net and fine bought, and the Labels column.

- New Purchase.** Pick the supplier, the metal, and Cash or Credit.
- Material In:** one line per item — gross weight, purity, rate per 10 g, and the **wastage %** the supplier charges. The **Fine + Wastage** column is what you are really paying for.
- Material Out:** metal you gave back to the supplier on the same invoice, if any.
- Discount, sub-tax, GST, TCS, and **Paid Amount**. A purchase can also be settled by handing over **fine gold** (Paid in Fine) at a rate — the rest stays due in rupees.
- Save Purchase** keeps the invoice open with its **Labels Tally**; **Save & Make Labels** jumps straight to Tag & Barcode with this invoice preselected.

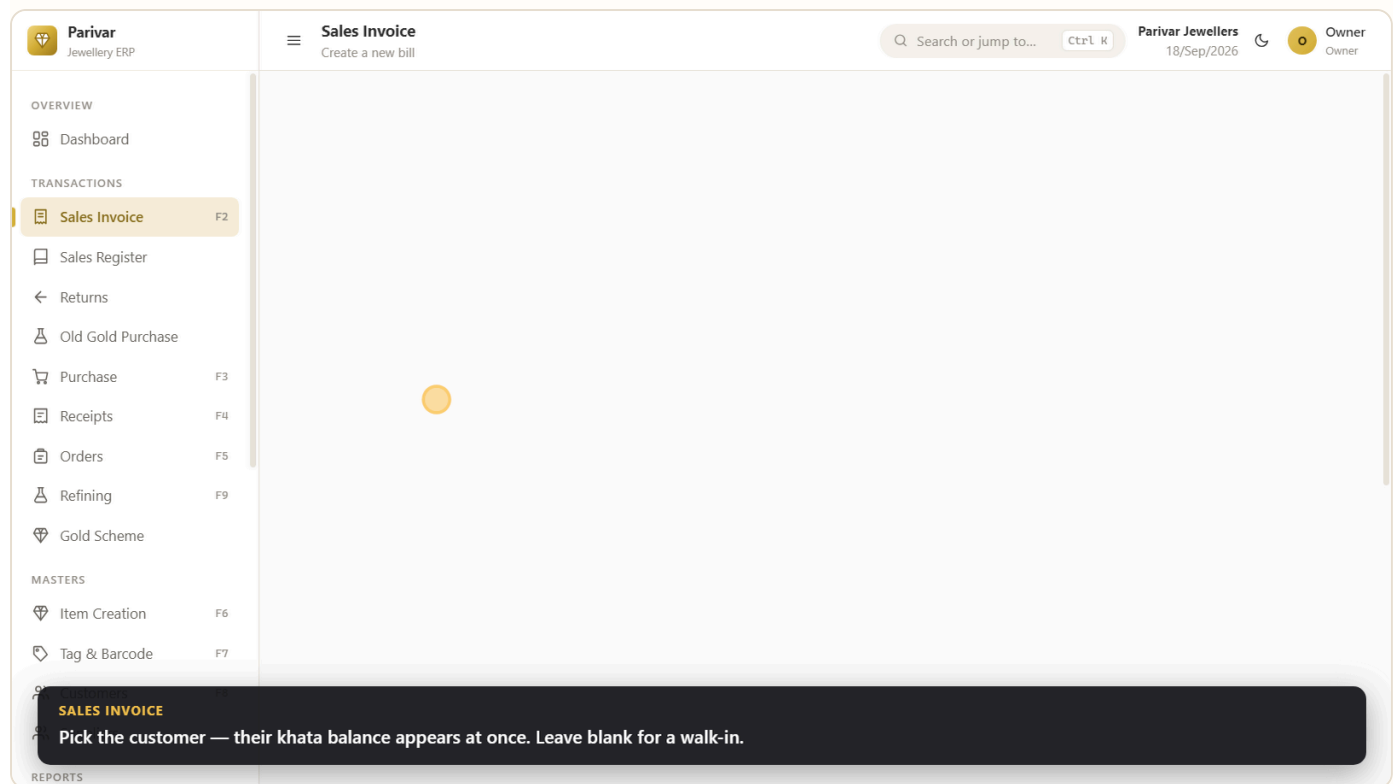

### **WHAT HAPPENS WHEN YOU SAVE**

The fine weight joins your loose metal. On credit, the amount goes onto the supplier's khata as money you owe. GST paid is counted as input tax for GSTR-2.

## 8 Sales Invoice — the everyday bill

Transactions → Sales Invoice (F2). Scan, rate, save, print.

The bill: customer, items grid, old gold, payment, and the live bill summary.

- 1 Customer:** type a name and pick, or leave blank for a walk-in. Their khata balance appears at once. + creates a new customer without leaving the bill.
- 2 Scan the tag** in the Tag column, or type the item name and choose the piece from the list. Weight, purity, making and hallmark fill in from the tag. The cursor then waits on the next line, so the next piece can be scanned straight away. A tag that is not found, already sold, or already on this bill is named in a message.
- 3** Type today's **Rate/10gm** once. Every further piece of the same purity picks up that rate by itself. Making can be a percentage of the metal value or a per-gram figure from the tag.
- 4** Bill Summary on the right updates live: goods, making, discount, GST (CGST + SGST or IGST), total.
- 5 Payment:** mode (Cash, UPI, Card, NEFT, Cheque) and Amount Received. **Split this payment** when part is cash and part is card.
- 6** **Save** (Ctrl+S), **Save & Print** (Ctrl+P), or **Save & New** to save and start the next customer's bill at once. **PDF** and **WhatsApp** are beside them.

WhatsApp PDF Save Save & Print

Bill Amount 65,045.00

One scanned piece at ₹62,000 per 10 g: goods, GST and total worked out.

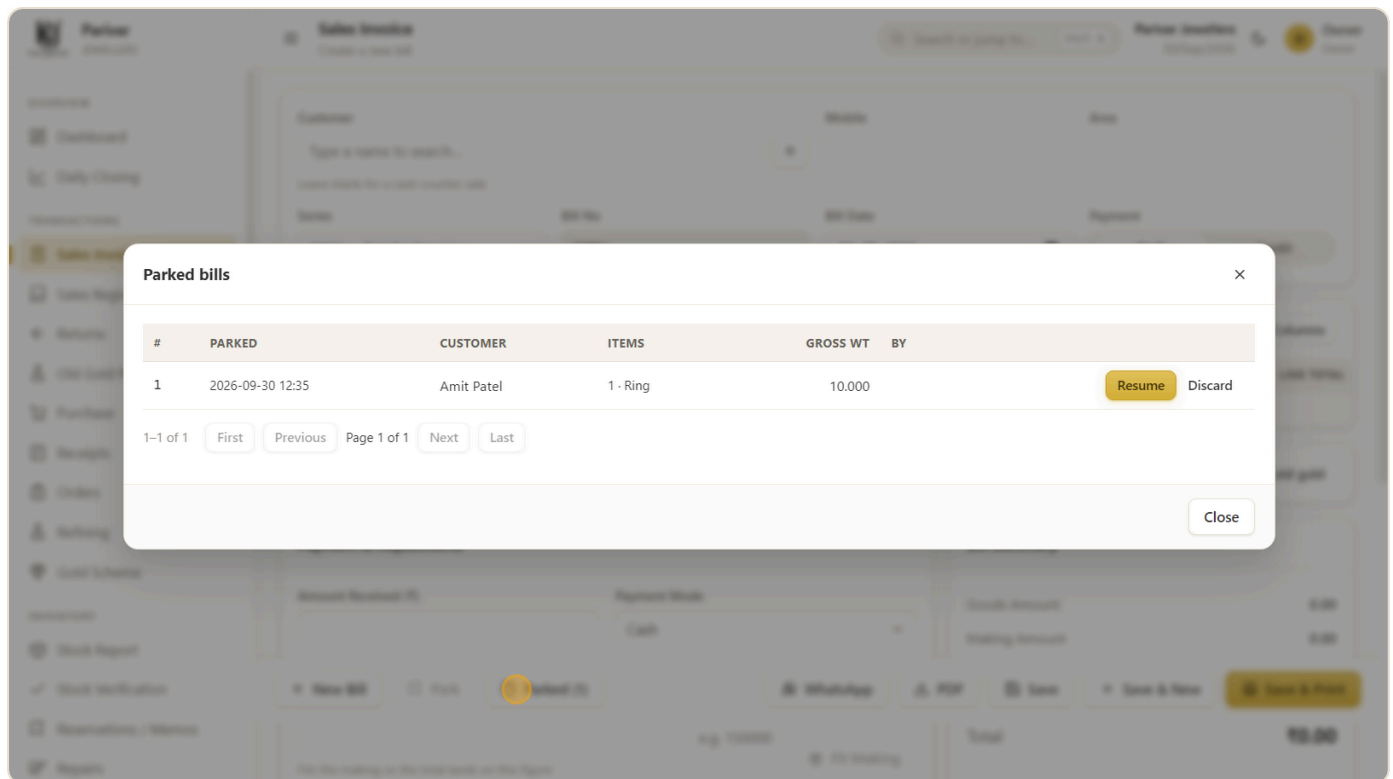

## Other things the bill can do

- **Start from the customer:** on Customers, Ledger or Outstanding, the small buttons on a customer's row open a new bill, a receipt or their ledger with the customer already picked. In the Sales Register, the return button on a bill opens a return with that bill's pieces filled in. The Dashboard figures open their full report when clicked.
- **Untagged item:** type a name with no tag for metal sold before it was labelled. Its weight comes off the loose pool. The **From Purchase** column lets you say which invoice it came from, so that invoice's tally comes down.
- **Loose items** (mani, fuli): pick the lot and type the grams taken.
- **Card fee:** if the bank's swipe charge is set on your bank account, the customer's share is added and your share is booked as an expense.
- **Loyalty points** and **Gold Saving Scheme** balances settle the bill once the customer is picked.
- **Weight-wise bill** for trade customers: the metal is owed in fine grams, not rupees; enter what they settle now and the rest stays on their gold khata.
- **Reverse calculation:** type the amount the customer wants to pay and the bill fits the rate or making to it.

### WHAT HAPPENS WHEN YOU SAVE

The piece is marked sold and leaves stock. The customer is charged the total less old gold; what they paid goes to cash or bank; the rest stays on their khata. GST is recorded for GSTR-1.

## Parking a bill

Parked bills waiting to be finished: Resume or Discard.

A customer steps away in the middle of a bill? Press **Park**. The bill is kept and the screen clears for the next customer. **Parked** shows how many are waiting; **Resume** brings one back exactly as it was, **Discard** throws it away. A resumed bill is saved **once**, even if Save is pressed twice or two counters open it together.

## 9 Old gold on a bill, estimates and credit bills

The three variations you use every week.

### Old gold in exchange

- 1 Make the bill for the new piece as usual.
- 2 Press **Add old gold**. Enter the old piece's gross weight, its **tunch** (purity %) and the rate you allow per fine gram.
- 3 Its value comes off the bill. The customer pays only the difference.

The screenshot shows the Parivar Jewellery ERP interface. The left sidebar contains navigation options: OVERVIEW (Dashboard), TRANSACTIONS (Sales Invoice, Sales Register, Returns, Old Gold Purchase, Purchase, Receipts, Orders, Refining, Gold Scheme), MASTERS (Item Creation, Tag & Barcode), and REPORTS. The main area displays a 'Sales Invoice' form. At the top, it says 'Create a new bill'. The form includes fields for Customer (Priya Deshmukh), Mobile (9890455667), Area (Aundh), Series (COM — Retail / Counter), Bill No (COM5), Bill Date (18-09-2026), and Payment (Cash). A red banner indicates 'Previous balance ₹1,49,150.35 Dr' with a 'View khata' link. Below this is an 'Items' table with columns: TAG, ITEM, FROM PURCHASE, QTY, GROSS WT, PURITY, STONE WT, STONE RATE, NET WT, RATE/10GM, MKG %, MKG AMT, AMOUNT, and LINE TOTAL. The table contains one item: RING Ring, tagged, 0, 12, 91.6, 0, 12, 62000, 3,600.00, 74,400.00, 78,045.00. Below the items table is a section for 'Old Gold Received (URD)' with a value of ₹61,248.00. This section has a table with columns: NAME, DESCRIPTION, GROSS WT, NET WT, PURITY %, RATE, and AMOUNT. It contains two rows: Purani chain (12, 12, 88, 5800, 61,248.00) and Old Gold (0). At the bottom, a black banner with yellow text reads: 'OLD GOLD EXCHANGE The customer pays only the difference. The old gold lands in your URD stock — it really comes in.' The bottom right corner shows 'Goods Amount' as 74,400.00.

Old Gold Received: 12 g at 88% — the value is deducted from the total.

#### THE OLD GOLD REALLY COMES IN

It is not only knocked off the total. The metal lands in your **URD stock** (old gold pool) and shows in the Day Book and Stock. You gave value for it, and now you hold it.

### Estimate (quotation)

Change **Series** to **ESM — Estimate**. **GST not required** ticks itself, because an estimate is not a tax invoice. Everything else works the same; the number comes from the estimate series.

Estimate series: GST not required is on by default.

Tick **Credit**, choose the customer (a credit bill needs one), and put only what they handed over in Amount Received. The balance goes onto their khata and shows under **Outstanding** until it is cleared with a Receipt.

### Returns

**New Sales Return** ×

The original bill is not changed. This creates a separate document dated when the goods came back, and reverses stock, money and metal from that day.

Against bill (optional) Return date

COM4 18-09-2026

Pick the original to pull its lines in — or leave blank and enter them by hand.

Party Reason

Sandip Jain Wrong size, short purity...

| ITEM | GROSS WT | STONE | NET WT | PURITY % | RATE/GM | MKG/GM | AMOUNT    |
|------|----------|-------|--------|----------|---------|--------|-----------|
| Ring | 10       | 0     | 10     | 91.6     | 6200    | 300    | 65,000.00 |

Refund now

GST % 3 Leave blank to adjust against the khata instead.

Goods ₹62,000.00 - Making ₹3,000.00  
GST ₹1,950.00  
**Credit to customer ₹66,950.00**

Cancel Save Return

**RETURNS**  
Pick the bill and its lines are pulled in. Stock comes back, money and metal reverse on the day it happened.

A sales return pulls the original bill's lines in.

- Returns → New Sales Return.** Pick the original bill; its lines are pulled in. Remove the lines that did not come back.
- Enter a refund amount if you paid cash back; leave blank to credit the customer's khata instead.
- Save Return.** The piece is back in stock, money and metal reverse on the return date.

### THE ORIGINAL BILL IS NEVER CHANGED

A return is its own dated document. A bill that was printed and reported stays exactly as it was — that is what keeps your GST return honest.

**Purchase Returns** work the same way for metal sent back to a supplier.

## 11 Old Gold Purchase — buying old gold outright

Transactions → Old Gold Purchase. A customer sells you old jewellery and buys nothing.

OLD GOLD PURCHASE

A customer sells you old jewellery. This bill pays them and books the metal into URD stock.

Old gold bills: fine weight, value, paid and balance.

- 1 **New Old Gold Bill.** Pick the customer, or leave blank for a walk-in (a walk-in must be paid in full).
- 2 One line per piece: name, description, gross, net, purity, rate per fine gram. The amount is priced on **fine weight**.
- 3 **Deduction** for melting loss or stones, if any. **Paid by:** cash or bank.
- 4 **Paid now:** leave blank to pay the whole amount. Type a smaller figure and the rest sits on the customer's khata as a **credit** until you pay it or they buy something.
- 5 **Save** or **Save & Print**. The bill prints on the same frame as the invoice.

**RECEIPTS**

Pick the party — the amount still due shows at once. Enter what they paid, and how.

New Receipt: the party's balance is shown while you type.

## Payment — money out

Pay a supplier by picking the supplier. Pay an **expense** — electricity, rent, tea, salary — by picking the expense head instead of a party. New heads are made under **Settings → Accounts**. This is the only way an expense reaches the cash book and the profit & loss.

## Metal Settlement

A trade customer who owes you fine grams settles some in cash at today's rate. Enter the grams and the rate; the metal khata drops and the money comes in.

## 14 Order Booking

Transactions → Orders (F5). What to make, by when, and the advance taken.

Orders with delivery date, status, advance and balance.

- 1 **New Order.** Customer, and the karagir who will make it (can be assigned later).
- 2 **Delivery Date** promised to the customer, and a separate earlier **Karagir Date** — the piece must be back with time to check and finish.
- 3 Lines: what to make, weight, purity, rate, making. **Advance Received** now. Old gold handed over at booking goes in the Old Gold at Booking table.
- 4 **Save Order.**
- 5 When the piece is ready, open the order and press **Convert to Sales Bill**. The bill is made from the order and the advance is adjusted on it automatically.

**KARAGIR**  
Pick the karagir. Issue Material records the grams you hand over — they sit on his gold khata.

Issue Material and Receive Order for one karagir.

- 1 Pick the karagir. **Issue Material**: the grams you hand over and their purity. They sit on his gold khata — he is holding your gold.
- 2 **Receive Order** when the piece comes back: gross, stone, purity, the **wastage %** you allow, and his **making rate per gram**. TDS if you deduct it.
- 3 The ledger shows whether he is square, still holds metal of yours, or is owed labour in cash.

## 16 Refining

Transactions → Refining (F9). Scrap out, pure gold back, the loss visible.

| INVOICE | DATE        | REFINERY       | DIRECTION | FINE WT | CHARGES | PAID | BALANCE |
|---------|-------------|----------------|-----------|---------|---------|------|---------|
| MI1     | 17/Sep/2026 | Shree Refinery | Received  | 35.621  | 0.00    | 0.00 | Settled |
| MO1     | 16/Sep/2026 | Shree Refinery | Sent out  | 36.120  | 0.00    | 0.00 | Settled |

REFINING

Metal sent to the refinery and what came back — per invoice, with the fine weight and charges.

Refining entries: direction, fine weight, charges, paid.

- 1 New Refining Entry.** Direction **Material Out**: pick the refinery and enter the scrap sent — gross, purity. Scan a tag to melt a tagged piece; it is marked melted.
- 2** When the pure gold returns, a new entry with direction **Material In**: weight and purity received, the refinery's charges and GST, what you paid.

Your stock drops when the metal leaves and rises when it comes back; the difference between fine out and fine in is your refining loss, in grams, on the screen.

## 17 Gold Saving Scheme

Transactions → Gold Scheme. Monthly savings plans, tracked to the rupee and the gram.

The screenshot shows the Parivar Jewellery ERP interface for the Gold Saving Scheme. The sidebar on the left contains navigation options: Overview (Dashboard, Sales Invoice, Sales Register, Returns, Old Gold Purchase, Purchase, Receipts, Orders, Refining), Masters (Item Creation, Tag & Barcode), and Reports. The main area is titled 'Gold Saving Scheme' with a subtitle 'Monthly savings plans'. It features a search bar and tabs for 'Members' and 'Scheme Types'. Below the tabs, there are four summary cards: 'Members' (0), 'Collected' (₹0.00), 'Metal Accrued' (0.000 g), and 'With Overdue Instalments' (0). A large message box states 'No scheme members' and provides an 'Enrol a member' button. A footer bar indicates 'GOLD SCHEME' and 'Members and their cards: paid so far, due, matured. Schemes on the other tab.'

Members and their cards; Schemes on the second tab.

### Design the plan once

**Schemes → New Scheme:** a name, the type, the period (say 12 months, 11 paid, 1 as your bonus), the monthly amount or grams, and the benefit at maturity.

| TYPE        | MEMBER SAVES                                                | AT MATURITY                                                             |
|-------------|-------------------------------------------------------------|-------------------------------------------------------------------------|
| On Amount   | Fixed rupees a month                                        | Rupees paid plus a rupee bonus                                          |
| On Weight   | Fixed rupees a month, converted to grams at that day's rate | Grams accrued plus a gram bonus — the member is protected if gold rises |
| Weight Wise | Fixed grams a month                                         | Grams plus a gram bonus                                                 |
| On Making   | Rupees                                                      | A making-charge waiver on the bill                                      |

### Enrol and collect

- Enrol Member:** customer, scheme, start date. The month-by-month schedule is created.

- 2 Each month open the member and press **Receive** on that instalment; cash or bank, and the day's rate for weight plans. **Remind** sends a WhatsApp for a due instalment.
- 3 At maturity the member buys: on their bill, the **Saving Scheme** box shows the balance and settles the bill. Anything left stays on the card or is handed back in cash.
- 4 Two cards for one person? **Merge Cards**.

**GOLD SCHEME**  
Open the member: every instalment with its due date. Receive marks one paid — cash or bank.

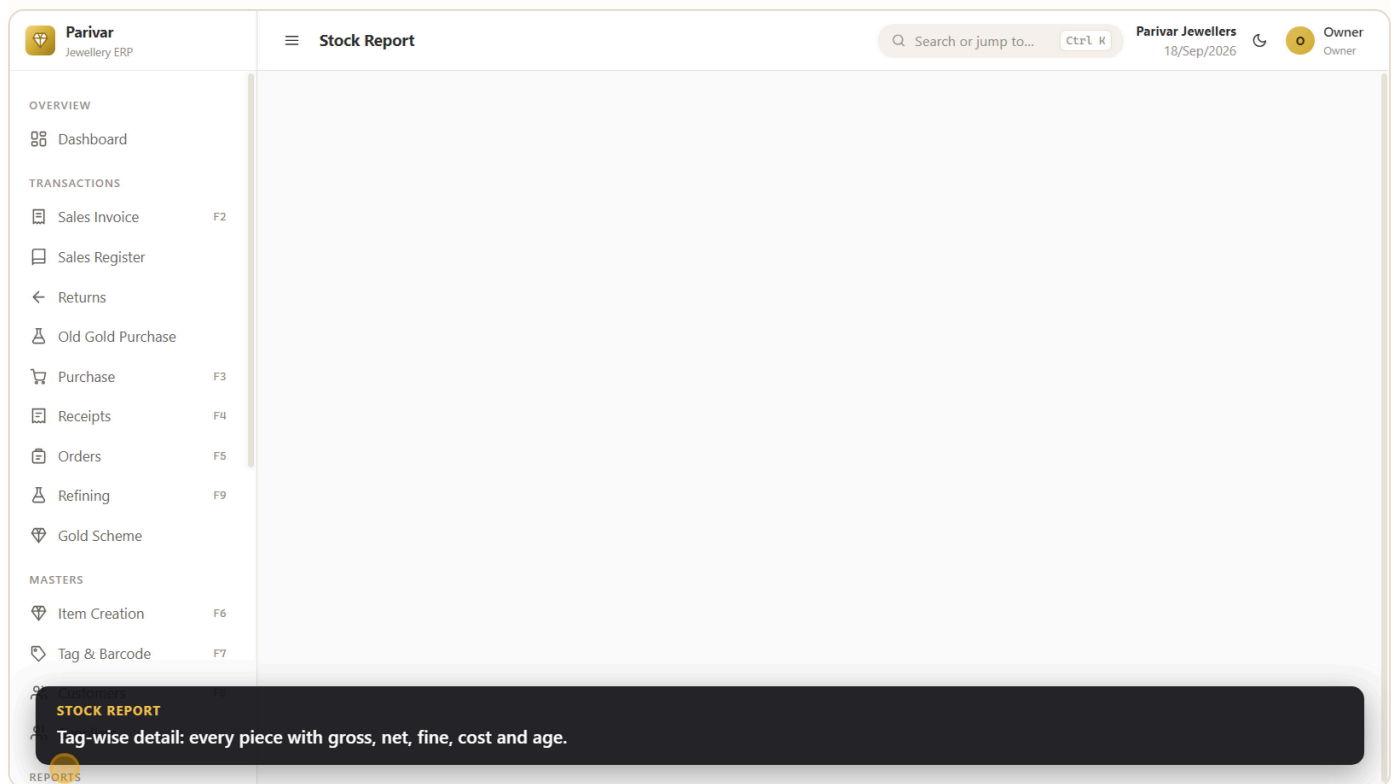

A member's card: instalments due, received, and the balance.

### SCHEME MONEY IS KEPT APART

It is a deposit you are holding, not a sale — so it lives in its own account (Gold Saving Scheme) and never muddles the customer's buying-and-selling khata. The bonus is added only once every instalment is in and the maturity date has passed.

## 18 Stock Report and Stock Verification

Inventory → Stock Report · Stock Verification.

Tag-wise stock: gross, net, fine, cost and age of every piece.

- Views: tag-wise detail, or summaries by item, item group, location, category, salesman, or shelf/tray.
- **Value at cost** uses the Cost/gm on each piece — the same basis the Balance Sheet uses for closing stock.
- **Edit Stock**: found a piece weighed wrong at stock-take? Fix it in place; the fine weight and your metal position move with it. Sold pieces cannot be edited here — fix the bill.
- **Grid Settings** on any table: hide, rename or reorder columns. Print, or export to CSV, Excel or Word.

### Finding a piece

Tag-wise (detail)

Tag, HUID, item, design or tray...

Edit Stock Columns Print Export

1-7 of 7 First Previous Page 1 of 1 Next Last

Totals cover all matching tagged pieces. Print and export include every match, across all pages.

Filters: metal, purity, design, category, location, tray, weight, HUID, supplier, availability and more.

- **Filters** narrow the list by metal, purity group, design, category, location, shelf or tray, size, weight and purity range, HUID recorded or missing, label printed, supplier, purchase batch, date entered, and **availability** (free to sell, or on hold). Each filter in use shows as a chip; click it to clear it.
- **Saved views**: save a set of filters under a name ("22K bangles, tray 3") and bring it back in one click. Saved on that computer only.
- Search finds a tag, HUID, item, design or tray. The list shows 50 pieces a page, but the totals, Print and Export always cover **every** matching piece.
- The same filters are on Tag & Barcode and Item Creation.

A count in progress: found, missing, and a tag that does not belong.

- Start Count** — for the whole shop or one location. The list of pieces that should be there is fixed at that moment.
- Scan each piece with the barcode gun, or type the tag and press Enter. Found pieces turn green; anything not scanned stays red — your list of what to look for.
- Pause** for lunch, or leave the screen; the count waits where you left it.
- Submit** when done. A manager or the owner approves and closes it. **Past Counts** keeps every earlier count.

| WHAT A SCAN SAYS | MEANING                                                                   |
|------------------|---------------------------------------------------------------------------|
| Found            | In stock and part of this count                                           |
| Wrong location   | In stock, but recorded at another location — put it back where it belongs |
| Duplicate        | Already scanned in this count                                             |
| Outside scope    | A real piece, but not part of this count                                  |
| Not in stock     | That tag was already sold — find out why it is on the tray                |
| Unknown          | No such tag in the software                                               |

### A COUNT DOES NOT CHANGE STOCK BY ITSELF

Missing pieces are listed, not written off. Look for them first; correct stock only when you are sure.

# 19 Reservations and approval memos

1-1 of 1 First Previous Page 1 of 1 Next Last

A piece held for a customer, and a ring out on approval.

A reserved piece, or one out on memo, **cannot be billed to anyone else** — the Sales Invoice refuses it until the hold ends.

| WHAT                | WHEN TO USE IT                                                            | HOW IT ENDS                                                                             |
|---------------------|---------------------------------------------------------------------------|-----------------------------------------------------------------------------------------|
| Reservation         | A customer asks you to keep a piece aside, with or without an expiry date | <b>Fulfilled</b> (then bill it), <b>Released</b> , or it expires at the end of its date |
| Memo out (approval) | A customer takes a piece home to decide                                   | <b>Returned</b> , or <b>Sold</b> (then bill it)                                         |
| Memo in             | A supplier leaves goods with you on approval                              | <b>Returned</b> to the supplier, or <b>Acquired</b>                                     |

Memos past their due date are marked overdue. Reserving and memos are for a manager or the owner.

**SOLD HERE DOES NOT MAKE THE BILL**

Marking a reservation fulfilled or a memo sold only lifts the hold. Make the bill in the Sales Invoice as usual.

## 20 Repairs

Inventory → Repairs. The customer's piece, from the counter to the karagir and back.

Repair jobs with their step, estimate, promised date and karagir.

A repair is the customer's gold, not yours: it never shows in your stock or your totals.

- 1 New Repair:** the customer (or a walk-in name), what the piece is, gross and net weight, stones, damage, the work asked for, the estimate and the date you promised.
- Move the job along with the button on its row: **Received** → **Assessed** → **Assigned** (pick the karagir) → **In progress** → **Ready** → **Delivered**. Cancel if the customer takes it back unrepaired.
- Jobs past their promised date turn red. **Open jobs** hides the finished ones.

A job can be corrected until it is delivered, and every step is kept with who did it and when.

## 21 Hallmarking

Inventory → Hallmarking. Pieces out to the centre, and back with their HUID.

The screenshot shows the Parivar Jewellers Hallmarking interface. The sidebar on the left contains navigation options under Overview, Transactions, and Inventory. The main area displays a table of hallmarking batches. The table has columns for Batch, Created, Centre, Status, Pieces, and Still Out. Two batches are listed: Batch #2 (Prepared) and Batch #1 (At centre). The interface also includes a search bar, a 'New Batch' button, and a 'Dispatch' button for the prepared batch.

| BATCH | CREATED     | CENTRE                             | STATUS    | PIECES | STILL OUT |
|-------|-------------|------------------------------------|-----------|--------|-----------|
| #2    | 30/Sep/2026 | Pune Assaying & Hallmarking Centre | Prepared  | 1      | 1         |
| #1    | 30/Sep/2026 | Pune Assaying & Hallmarking Centre | At centre | 2      | 2         |

One batch at the centre, one ready to send.

- 1 New Batch:** the centre's name, then scan or search the pieces. The count and total weight add up as you go.
- 2 Dispatch** when the batch leaves the shop. From that moment those pieces **cannot be sold**. (A manager or the owner dispatches.)
- 3 Receive** when they come back: for each piece, Returned, Failed or Still at centre. Type the **HUID** of each returned piece — 6 letters or digits; the software refuses one already used on another piece.

Returned and failed pieces can be sold again at once; pieces still at the centre stay blocked. The batch reads **Partial** until every piece is back, then **Closed**.

## 22 Catalogue — names and categories

Inventory → Catalogue. Keeping item names tidy, once. Owner only.

The screenshot shows the 'Catalogue' section of the Parivar Jewellers software. The left sidebar contains navigation links for Overview, Transactions, and Inventory. The main content area is divided into two sections: 'Categories' and 'Aliases / Local Names'.

**Categories Section:**

- Buttons: Import CSV, Export, Add Category
- Search: Search categories... (with a 'Show archived' checkbox)
- Table:

| NAME                 | PARENT | PIECES IN STOCK | STATUS |
|----------------------|--------|-----------------|--------|
| Bridal               | —      | 0               | Active |
| Bridal Necklace Sets | Bridal | 0               | Active |
| Daily Wear           | —      | 0               | Active |

**Aliases / Local Names Section:**

- Button: Import CSV
- Text: Another name for an item, category or design — e.g. a local-language name — so it can be found by either.
- Form fields: For (dropdown), Name (Find item...), Also known as (text), Language (hi, gu...), Add
- Search: Search aliases or names...
- Table:

| ALIAS | FOR  | NAME     | LANGUAGE |
|-------|------|----------|----------|
| Haar  | item | Necklace | —        |

Categories with pieces in stock, and "Haar" as another name for Necklace.

- **Categories:** make them, put one under another (Bridal → Bridal Necklace Sets), rename or archive them. A rename updates every tag that carries it.
- **Other names:** give an item, category or design the name your customers use — "Haar" for Necklace — and search finds it either way.
- **Import CSV:** load categories and other names from a spreadsheet. The file is checked first and errors are listed by line; loading the same file twice changes nothing.
- **Merge:** two items that are really one ("Ring" and "Rings") become one. Every bill, purchase, tag and order moves to the one you keep, and the old name is kept as another name. Gold and silver items are never merged.

## 23 Day Book — closing the shop

Reports → Day Book. The one page to read before pulling the shutter.

**DAY BOOK**  
Sales, purchases, old gold, receipts and payments for the day, cash and credit.

The Day Book: transactions, gold position, accounts, and takings by mode.

- 1 **Transactions:** sales, purchases, old gold on bills, old gold bills, receipts and payments — cash and credit.
- 2 **Stock details:** opening and closing in gross, net and fine, per metal, and URD (old gold) separately. A shop counting trays counts gross — that is why all three are there.
- 3 **Accounts:** every cash and bank account, opening, movement, closing. Count the drawer against **Cash Account**. It should match — Daily Closing (chapter 24) does the count note by note and records it.
- 4 **Received by mode:** cash, UPI, card, NEFT — what came in today, by how it was paid.
- 5 Print it, file it, and take your backup (chapter 31).

### ONLY CASH SITS IN THE DRAWER

A card swipe, UPI, NEFT or a cheque all go to the bank, not the drawer. So if the drawer does not match the Cash figure, something really is short — and that is a number worth trusting.

## 24 Daily Closing — counting the drawer

Overview → Daily Closing. The drawer against the books, signed off.

Cash Book for the day

| PARTICULARS                | DOC | IN   | OUT  | BALANCE   |
|----------------------------|-----|------|------|-----------|
| Opening                    |     |      |      | 25,000.00 |
| No cash moved on this day. |     |      |      |           |
| Closing                    |     | 0.00 | 0.00 | 25,000.00 |

Expected cash from the cash book, the drawer counted note by note, and the difference.

- 1 Pick the date and press **Open Close**. **Expected cash** is the day's opening plus that day's cash — the same figure as the Cash Book. Card, UPI, NEFT and cheques are not counted as cash.
- 2 Type how many of each note and coin are in the drawer, and any loose cash. The short or excess shows as you type; **Save Count**.
- 3 **Submit** the day.
- 4 The owner **approves** it. A difference needs a note saying why. The owner can also match card and UPI settlements to that day's bank receipts.

If a bill, receipt or return for that day is changed after the count, the close is marked out of date so you know to count again; the owner can **reopen** it with a reason. **All Closes** lists every day closed.

### AN APPROVED DAY CAN STILL BE EDITED

Approving a day does not lock its bills. A later change is only flagged on that day's close — so check the close again if a bill was corrected.

₹8,03,745.37

Net Profit

Trading and Profit & Loss for the period.

- **Trial Balance:** every head, footing to the paisa, for any period.
- **Profit & Loss:** sales and other charges against purchases, old gold, refining charges, karagir labour, discounts and shop expenses, with closing stock at cost.
- **Balance Sheet:** cash, bank, debtors and stock against creditors and scheme deposits.

## WHY THE BOOKS CAN ALWAYS BE TRUSTED

They are built from your bills, purchases and receipts every time you open them — not kept as a separate set of totals that could drift. Change a document and the books change with it.

## 27 MIS reports — the owner's questions

Reports → MIS & Scheme Reports.

The screenshot displays the 'MIS & Scheme Reports' section of the Parivar Jewellery ERP system. The interface includes a sidebar with navigation options like Overview, Transactions, and Masters. The main content area shows a report for 'Non-Moving Items' with filters for 'Quiet after 90 days'. It features four summary cards: 'Non-Moving Pieces' (0), 'Quiet Customers' (0), 'Profit at Cost' (₹-4,18,348.60), and 'Excluded from Margin' (0). Below these is a section for 'Non-Moving Items' which is currently empty, displaying a 'Nothing to show' message. A dark banner at the bottom highlights the 'MIS' report type and its focus on non-moving stock, quiet customers, top sellers, and purity-wise profit.

Run both systems side by side before you trust this one. Keep entering the day's work in whatever you use now as well, for a week or a month. Then type what that system says below and see whether the two agree. Anything that does not match is worth chasing before you switch over — not after.

Figures Checked

0 / 8

Fill a box in to check it

Agree

0

Differ

0

Chase these before switching

Your old books, against this one

| FIGURE           | THIS SOFTWARE   | YOUR OLD BOOKS       | DIFFERENCE | STATUS      |
|------------------|-----------------|----------------------|------------|-------------|
| Cash in hand     | ₹15,512.00      | <input type="text"/> | —          | Not checked |
| Bank balance     | ₹12,000.00      | <input type="text"/> | —          | Not checked |
| Customers owe us | ₹2,22,093.89    | <input type="text"/> | —          | Not checked |
| We owe suppliers | ₹1,61,60,618.54 | <input type="text"/> | —          | Not checked |

CHANGEOVER CHECK

Type what your old book says — cash, bank, debtors, gold on hand. The software shows its figure and the difference.

Type what your old book says; the software shows its own figure and the difference.

- 1 For one full month — a month with a busy day in it — keep writing every bill, purchase and receipt in your old book as well as here.
- 2 At month end open Changeover Check. Type what the old book says: cash, bank, who owes you, what you owe, gold on hand.
- 3 Anything marked **Differs** is a question to settle before you trust this book. A blank box shows as *Not checked*, never as agreement.
- 4 When the figures you care about say **Agrees** two weeks running, stop the double work.

## 30 Settings, users, invoice design, phone view

System → Settings.

The screenshot shows the 'Settings' page for 'Parivar Jewellers'. The 'Company' tab is selected, showing fields for Shop Details and Bank Details. A dark overlay at the bottom states: 'SETTINGS Company: name, address, GSTIN, bank — printed on every bill.'

| TAB              | WHAT IT IS FOR                                                                                                                                                                                             |
|------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Company          | Shop name, address, GSTIN, state, bank details, financial year, the declaration printed on bills.                                                                                                          |
| Invoice Design   | Paper (A4 or 3-inch thermal), title, colour, which columns print, logo, bank details, old gold table, signature, footer note. The preview is the real bill.                                                |
| Bill Numbering   | Series and prefixes: COM for counter bills, ESM for estimates, MI for purchases, O for old gold bills...                                                                                                   |
| Accounts         | Cash, bank and expense heads; opening balances; the bank's card-swipe charges.                                                                                                                             |
| Making & Wastage | Default making charge and wastage % per item or item group, so nothing is retyped on every tag, bill and purchase.                                                                                         |
| Users            | Staff, Manager, Owner logins. Staff can bill, take money, enter stock and run reports. Managers can also refine and remove tags. Only the Owner can delete documents, change settings or restore a backup. |
| Data & Backup    | Backup now, restore, Google Drive backup (chapter 31).                                                                                                                                                     |
| Mobile View      | Read-only access from a phone on the shop Wi-Fi.                                                                                                                                                           |

Company details print on every bill.

| TAB              | WHAT IT IS FOR                                                                                                                                                                                             |

Each of these is recorded with the name of the person signed in, so every change can be traced to who made it.

## 31 Backup — every single evening

The one habit that matters more than all the others.

- 1 **Settings → Data & Backup → Backup Now**. Save it to a **pen drive** you take home.
- 2 Or set up **Google Drive** once and the backup goes there by itself.
- 3 Do it at close, every day. It takes ten seconds.

### A BACKUP ON THE SAME PC IS NOT A BACKUP

If the machine is stolen or its disk dies, a copy on that machine dies with it. Pen drive or Google Drive — that is what saves you.

## If the power goes, or the PC dies

A power cut cannot corrupt your books. A half-finished bill is simply not saved — the software writes a bill completely or not at all. If the machine itself dies, install the software on a new one and **Restore** the latest backup. Before it replaces anything, it copies the current books aside, so even restoring the wrong file is undoable.

## Practice entries and wrong entries

- **One wrong bill or purchase:** open it and delete it (Owner login). Stock and khata correct themselves.
- **All practice entries, before the real books start:** **Settings → Data & Backup → Clear All Entries** (Owner only). Type **DELETE** to confirm. Every bill, purchase, tag, stock entry, order, scheme, voucher and khata entry goes, with all customers and suppliers; bill and tag numbers start again from 1. Shop details, logins, items, accounts, rates and settings stay. A **before-clear** copy is saved first — restore it to undo.

## 32 Printing the barcode tags

Tag & Barcode → tick pieces → Print labels.

- **TSC 100 × 15 mm tag** (the default): the jewellery rat-tail tag on the TSC TL240. The barcode, tag number, item, purity and weights print in the head; the thin tail that wraps the piece is left blank. In the printer driver set the paper size to 100 × 15 mm and let the app's page size through.
- **Tag roll** 50 × 12 mm, **A4 sheets** of 65 or 24 labels — choose in the print dialog.
- **Not printed** filter lists only pieces whose label has never been run, so a batch is finished without labelling anything twice.
- **Company logo**: the mark and the shop's name print on the back half. Fold the tag at its centre: barcode and details on the front, logo on the back.
- Nothing needs setting: the dialog opens with **Head length** 30 mm, **Logo panel** 30 mm and **Printer shift** 7 mm, measured off the shop's tags and TL240, and remembers any change on that machine. **Printer shift** is how far right of the tag's edge the printer starts printing; if the barcode reaches the fold, raise it by a millimetre, and if the logo sits left of centre on the back, lower it. The printer cannot print in that first strip, so the front keeps a blank edge on the left.

### IF THE BOTTOM OF AN A4 BILL IS CUT

The bill is sent to the printer as A4. If it still stops short, open the printer's own settings in Windows and set its default paper to A4 rather than Letter, and turn off any "fit to page" or "scale" option in the driver. **Save PDF** on the same bill always gives a full page — print that PDF once to confirm the bill itself is complete.

### IF THE BOTTOM OF A LABEL IS CUT

Check the driver's paper size is 100 × 15 with no margin. The tag layout leaves clear space above and below, so a cut label means the printer is feeding late — recalibrate the gap sensor on the TL240.

## 33 How every number is worked out

So no figure on a bill is ever a mystery.

### Weights

$\text{Net Weight} = \text{Gross} - \text{Stone} - \text{Beads} - \text{Bag}$

$\text{Fine Weight} = \text{Net} \times \text{Purity} \div 100$

Example: 10.000 g gross, no stones, 91.6% → net 10.000 g, fine 9.160 g.

### A sale bill

$\text{Goods} = \text{Net} \times \text{Rate per gram}$  (rate is typed per 10 g, stored per gram)

$\text{Making} = \text{Net} \times \text{Making per gram}$  or  $\text{Goods} \times \text{Making \%}$

$\text{Bill} = \text{Goods} + \text{Making} + \text{Hallmark} + \text{Stone} + \text{Diamond}$

$\text{Taxable} = \text{Bill} - \text{Discounts} - \text{Loyalty}$

$\text{GST} = \text{Taxable} \times \text{GST \%}$  (CGST + SGST within the state, IGST outside)

$\text{Total} = \text{Taxable} + \text{GST} + \text{Other} + \text{TCS} + \text{Card fee}$

$\text{Balance} = \text{Total} - \text{Old Gold} - \text{Received} - \text{Scheme}$

Example: 12.000 g at ₹4,590 with making ₹300/g and GST 3% → goods ₹55,080, making ₹3,600, bill ₹58,680, GST ₹1,760.40, total ₹60,440.40.

### Old gold

$\text{Fine} = \text{Net} \times \text{Purity} \div 100$

$\text{Value} = \text{Fine} \times \text{Rate you allow}$

Example: 3.000 g at 80% allowed at ₹4,500 → 2.400 g fine → ₹10,800 off the bill.

### Purchase

$\text{Fine} + \text{Wastage} = \text{Net} \times \text{Purity} \div 100 \times (1 + \text{Wastage \%})$

$\text{Amount} = \text{Fine} + \text{Wastage} \times \text{Rate per gram}$

### Karagir

$\text{Metal still with him} = \text{Issued fine} - \text{Received fine} - \text{Wastage allowed}$

$\text{Labour owed to him} = \text{Net received} \times \text{Making rate} - \text{TDS}$

## Dr and Cr

|             |                         |                         |
|-------------|-------------------------|-------------------------|
| Money khata | Dr = they owe you       | Cr = you owe them       |
| Gold khata  | Dr = they owe you grams | Cr = you owe them grams |

## 34 When a figure looks wrong

Before you worry — the usual, ordinary reasons.

| WHAT YOU SEE                              | USUALLY BECAUSE                                                                                                                                             |
|-------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Stock value looks low                     | Pieces with no Cost/gm are left out of the value. The Stock Report says how many — fill them in.                                                            |
| Cash or bank is off                       | The account's opening balance (Settings → Accounts). Or a card/UPI receipt entered as Cash — only cash goes to the drawer.                                  |
| A customer's balance is wrong             | Their opening balance, or a bill entered in one book and not the other during changeover. Open their ledger and walk it down.                               |
| Gold on hand does not match the trays     | Loose bullion and old gold in the safe count too — not just tagged pieces. See the Day Book's stock details and URD stock.                                  |
| "This tag is not in stock"                | That piece is already sold, melted or at another branch. It cannot be billed twice — the software is protecting you.                                        |
| A purchase shows "... g to label" forever | The metal was sold untagged without naming the purchase, or tagged with All loose metal. Both are fine; the tally only tracks what was tied to the invoice. |
| Old gold bill refuses to save             | A walk-in with no customer must be paid in full; a balance needs a customer's khata to sit on.                                                              |
| A scheme benefit has not shown            | It is added only once every instalment is in and the maturity date has passed.                                                                              |
| The label prints with the bottom cut      | Printer paper size or gap calibration — chapter 32.                                                                                                         |

Whatever it is, your evening backups mean you can always step back to yesterday.

### Shortcuts

|                   |                            |
|-------------------|----------------------------|
| F2                | New sales bill             |
| F3                | Purchase                   |
| F4                | Receipts & Payments        |
| F5                | Orders                     |
| F6                | Item Creation              |
| F7                | Tag & Barcode              |
| F8                | Customers                  |
| F9                | Refining                   |
| Ctrl + K          | Search pages and customers |
| Enter in Tag cell | Look up the scanned tag    |
| Esc               | Close a window             |

### Words used

|                       |                                                      |
|-----------------------|------------------------------------------------------|
| <b>Fine weight</b>    | Pure gold in a piece: net × purity.                  |
| <b>Tunch / purity</b> | How pure, in percent. 22K = 91.6%.                   |
| <b>URD</b>            | Old gold taken from customers (unregistered dealer). |
| <b>Loose metal</b>    | Bullion, scrap and old gold not yet tagged.          |
| <b>Khata</b>          | A party's ledger — money and gold.                   |
| <b>Dr / Cr</b>        | They owe you / you owe them.                         |
| <b>Wastage</b>        | Metal lost in making, charged as a %.                |
| <b>Weight-wise</b>    | A bill settled in grams, not rupees.                 |
| <b>Estimate</b>       | A quotation, not a tax invoice — no GST.             |
| <b>Tally</b>          | A purchase's bought weight against its labels.       |

Parivar Jewellery ERP · Shop Owner's Manual · Version 1.29. Keep the daily backup, count the drawer each night, and reconcile against your old book for the first month. Do those three things and the rest looks after itself.
